Walk through life with camino!

Walk through life with camino!

Walk through life with camino

El Camino Real, "The King's Highway," is a historic road connecting Mexico and California. We are inspired by all the wondrous journeys that have taken place along this road. Each design in camino represents those precious memories. We hope to convey the memories of images, scenery and emotions through our design.

Fusion, the core concept of camino, is inspired by the diverse backgrounds of our team. We grew up in different countries with different life experiences. Each of us brought along a piece of our world into the spirit of camino. Fusion is also the principle of our material choices. Through various materials, every camino design represents the unique perspectives and displays the unique trace of our lives.

Drawing inspiration from every encounter, we continue on our journeys to creating our own "King's Highway" .

The word "camino" means path in Spanish. As global citizens, we often travel between countries and cities. We settle around the world and keep pursuing our dreams. Yet while we are amazed by the wonders of the world, we still have the longing for belonging.

Therefore, "camino" was born for every "urban traveller." The designs in camino are connected by the central motif of providing "accessories for primary living spaces" and "centerpieces for secondary room". Lightweight and easy to carry camino's items will fit seamlessly into your drifting lifestyle and give you a sense of belonging.

In camino, each of us is able to find our true self in our design. We hope you can also see yourself in camino and be empowered to embark on your own journey.

camino × ViiCHENDESIGN

“A quiet night with only you
and the moonlight,
always reminds you of home.”

After observing moonlight shining through a screen window in a traditional Chinese house, the designer Vii Chen was inspired to create an image that simulates the serene and nostalgic atmosphere. INTERLACED Screen & Lamp vividly portrays that nostalgia invoked by those breezy and moonlight-filled nights for every modern nomad around the world.

INTERLACED SCREEN & LAMP

The critically-acclaimed INTERLACED Screen & Lamp series includes three wire mesh screens of different shapes that allow users to diffuse the light as they wish. Inspired by the movement of moonlight shining through a screen window, INTERLACED offers unlimited possibilities to orchestrate, experiment, and design the interaction between light and shadow. It is a mini light art installation that makes everyone an artist.
